## AUDITOR'S REPORT

China Audit Asia Pacific ShenZi (2025)010250

To the Board of Directors of Hypa Mind Pte. Ltd.,

### I. Auditor's Opinion

We have audited the financial statements of Hypa Mind Pte. Ltd. (herein after referred to as "the Company"), which comprise the Company's balance sheets as at December 31, 2024, and the Company's income statements, the Company's statements of cash flow and the Company's statements of changes in owners' equity for the year ended December 31, 2024, and as well as the notes to the financial statements.

In our opinion, based on our audits, the accompanying financial statements present fairly, in all material respects, the financial position of the Company. as of December 31, 2024, and the results of its operations and its cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

### II. Basis for opinions

We conducted our audit in accordance with the Auditing Standards for Certified Public Accountants of China. Our responsibilities under those standards are further described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section of our report. We are independent of the Company with the Code of Ethics for Chinese Certified Public Accountants, and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### III. Responsibilities of Management and Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the Financial Reporting Standards in Singapore, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The directors' responsibilities include overseeing the Company's financial reporting process.

### IV. Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with China Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with China Standards on Auditing, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- (1) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- (2) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose to express opinions on the effectiveness of internal control.
- (3) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- (4) Conclude on the appropriateness of the management's use of the going concern basis of accounting, and meanwhile, based on the audit evidence obtained, on whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- (5) Evaluate the overall presentation (including disclosure), structure and content of the financial statements and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

#### **1 REPORTING ENTITY**

Hypa Mind Pte. Ltd. (the “Company”) (Registration Number: 201619442C) is a private limited company incorporated and domiciled in Singapore with its registered office and principal place of business at 135 Middle Road, #02-27, Bylands Building, Singapore 188975.

The principal activity of the Company is that of information technology services and fixed income investment activities .

The financial statements of the Company for the years ended December 31, 2024 was authorised for issuance by the Board of Directors on September 29, 2025.

#### **2 BASIS OF PREPARATION**

The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The term “IFRS” also includes International Accounting Standards (IASs) and the related interpretations of the interpretations committees (Standard Interpretations Committee (SIC) and International Financial Reporting Interpretations Committee (IFRIC)).

The Company’s financial statements have been prepared on a historical cost basis.

The financial statements of the Company are presented in United States Dollar (US\$ or USD). The functional currency of the Company is USD..

#### **3. ADOPTION OF NEW AND REVISED STANDARDS**

The Company has applied a number of amendments to IFRS Accounting Standards issued by the International Accounting Standards Board (IASB) that are mandatorily effective for an accounting period that begins on or after 1 January 2023. Their adoption has not had any material impact on the disclosures or on the amounts reported in these financial statements except as below.

##### ***Amendments to IAS 1 and IFRS Practice Statement 2: Disclosure of Accounting Policies***

The Company has adopted the amendments to IAS 1 Presentation of Financial Statements for the financial year ended December 31, 2024. The amendments change the requirements in IAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term ‘significant accounting policies’ with ‘material accounting policy information’. Accounting policy information is material if, when considered together with other information included in an entity’s financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material.

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

The IASB has also developed guidance and examples to explain and demonstrate the application of the ‘four-step materiality process’ described in IFRS Practice Statement 2.

#### ***Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors – Definition of Accounting Estimates***

The Company has adopted the amendments to IAS 8 for the year ended December 31, 2024. The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty”. The definition of a change in accounting estimates was deleted.

#### ***Amendments to IAS 12 Deferred Tax related to Assets and Liabilities arising from a Single Transaction***

The Company has adopted the amendments to IAS 12 for the first time on January 1, 2023. The amendments introduce a further exception from the initial recognition exemption. Under the amendments, an entity does not apply the initial recognition exemption for transactions that give rise to equal taxable and deductible temporary differences. Depending on the applicable tax law, equal taxable and deductible temporary differences may arise on initial recognition of an asset and liability in a transaction that is not a business combination and affects neither accounting profit nor taxable profit.

Following the amendments to IAS 12, an entity is required to recognise the related deferred tax asset and liability, with the recognition of any deferred tax asset being subject to the recoverability criteria in IAS 12.

The adoption of the above standards and interpretations did not have a material impact on the financial statements for the year ended December 31, 2024.

#### ***New and revised IFRS Accounting Standards in issue but not yet effective***

At December 31, 2024, the Company has not applied the following new and revised IFRS Accounting Standards that have been issued but are not yet effective:

Amendments to IAS 21	<i>Lack of Exchangeability</i> <sup>1</sup>
Amendments to IFRS 9 and IFRS 7	<i>Amendments to the Classification and Measurement of Financial Statements</i> <sup>2</sup>
Annual improvements to IFRS – Volume 11 <sup>2</sup>	
Amendments to IFRS 9 and IFRS 7	<i>Contracts Referencing Nature-dependent Electricity</i> <sup>2</sup>
Amendments to IFRS 18	<i>Presentation and Disclosure in Financial Statements</i> <sup>3</sup>

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

- <sup>1</sup> Effective for annual periods beginning on or after January 1, 2025, with early application permitted.
- <sup>2</sup> Effective for annual periods beginning on or after January 1, 2026, with early application permitted.
- <sup>3</sup> Effective for annual periods beginning on or after January 1, 2027, with early application permitted.

The directors do not expect that the adoption of the Standards listed above will have a material impact on the financial statements of the Company in future periods.

#### **4 MATERIAL ACCOUNTING POLICIES INFORMATION**

##### **FAIR VALUE MEASUREMENT**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability which market participants would take into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of IFRS 16 Leases, and measurements that have some similarities to fair value but are not fair value, such as value in use in IAS 36 Impairment of Assets.

Fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

##### **FINANCIAL INSTRUMENTS**

Financial assets and financial liabilities are recognised on the Company's statement of financial position when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value, except for trade receivables that do not have a significant financing component which are measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets and financial liabilities as appropriate, on initial recognition.

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

#### **Financial assets**

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are measured subsequently in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

#### Classification of financial assets

Debt instruments that meet the following conditions are measured subsequently at amortised cost:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

#### Amortised cost and effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. On the other hand, the gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

Interest is recognised using the effective interest method for debt instruments measured subsequently at amortised cost, except for short-term balances when the effect of discounting is immaterial.

#### Foreign exchange gains and losses

The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate as at each reporting date. Specifically, for financial assets measured at amortised cost, exchange differences are recognised in profit or loss in the “other operating expenses/income” line item.

#### Impairment of financial assets

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

The Company recognises a loss allowance for expected credit losses (“ECL”) on financial assets measured at amortised cost. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

Financial instruments are classified into the three stages based on the changes in credit quality since the initial recognition as summarised below:

- ECL measurement for the Stage 1 financial instruments will be based on a 12-month horizon, while those in the Stage 2 and 3 categories will be measured based on the lifetime of the instruments.
- Financial instruments that are non-credit impaired on initial recognition are classified in “Stage 1” and its credit risk is continuously monitored by the Company.
- If a significant increase in credit risk since initial recognition is identified, the financial instruments will be transferred to “Stage 2” and remain as non-credit impaired. Further details on “significant increase in credit risk” is described below.
- If financial instrument is credit impaired, the financial instrument will be transferred to “Stage 3”.

#### Measurement of ECL

The measurement of ECL is a function of probability of default (“PD”), loss given default (“LGD”) and exposure at default (“EAD”). The 12-month PDs and lifetime PDs respectively represent the PD occurring over the next 12 months and the remaining maturity of the instrument. These inputs are generally derived from internally developed statistical models and other historical data and they are adjusted to reflect probability-weighted forward-looking information.

A loss allowance for lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

For loans given to individual customers, the Company measures ECL on a collective basis as they share similar economic risk characteristics.

#### Definition of default

The definition of default is used in measuring the amount of ECL and in the determination of whether the loss allowance is based on 12-month or lifetime ECL, as default is a component of the probability of default (PD) which affects both the measurement of ECLs and the identification of a significant increase in credit risk (see Note 4).

The Company considers the following as constituting an event of default:

- the borrower is past due more than 30 days on any material credit obligation to the Company; or

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

- the borrower is unlikely to pay its credit obligations to the Company in full.

This definition of default is used by the Company for accounting purposes as well as for internal credit risk management purposes.

#### Significant increase in credit risk

In assessing whether the credit risk of an asset has significantly increased, the Company takes into account reasonable and supportable qualitative and quantitative factors and forward looking information. In line with regulatory guidelines, customers' utilisation of relief measures due to economic impact does not automatically result in significant increase in credit risk and a transfer to Stage 2. The assessment of customers' risk of default continues to be performed holistically, taking into consideration the customers' ability to make payments based on the rescheduled payments and their creditworthiness the long term.

#### Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as default or past due event;
- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lenders would not otherwise consider;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

#### Write-off policy

Financial assets are written off when the Company has no reasonable expectations of recovering the financial asset (either in its entirety or a portion of it). This is the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. A write-off constitutes a derecognition event. Financial assets written off may still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

#### *Measurement and recognition of expected credit losses*

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive, discounted at the original effective interest rate.

If the Company has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

conditions for lifetime ECL are no longer met, the Company measures the loss allowance at an amount equal to 12-month ECL at the current reporting date, except for assets for which the simplified approach was used.

#### Presentation of allowance for ECL in the financial statements

Loss allowances for ECL are presented in the statement of financial position as a deduction from the gross carrying amount of the assets

The Company recognises an impairment loss and gain upon reversal of allowance in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

#### **Financial liabilities and equity instruments**

##### Classification as debt or equity

Financial liabilities and equity instruments issued by the Company are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

##### Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments issued are recorded at the proceeds received, net of direct issue costs.

##### Financial liabilities

All financial liabilities are measured subsequently at amortised cost using the effective interest method.

##### Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired.

#### **PROVISION**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

#### **REVENUE RECOGNITION**

##### Provision of technical services

Revenue from technical services is recognized based on the five-step approach outlined below.

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation

The Company is engaged in providing technical service to its clients. Revenue from contracts with customers is recognized when the control of service is transferred to customers. The amount of revenue to be recognized is measured based on consideration which the Company expects to receive in exchange for its services. The consideration that the Company receives in exchange for its services may be fixed or variable. Variable consideration is only recognized to the extent it is highly probable that a significant reversal will not occur.

fixed income investment activities .

Interest income are recognised in the profit or loss as they accrue, taking into account the effective yield of the asset or an applicable fixed or floating rate. Where charges (such as upfront fee) are added to the principal financed at the commencement of the period, the general principle adopted for crediting income to the profit or loss is to spread the income over the period in which the repayments are due using the effective interest rate method (Refer to *Financial Instruments* for accounting policy in relation to effective interest method). For financial assets that have become credit-impaired to subsequent to initial recognition, the Company apply the effective interest rate to the amortised cost of the financial assets. If the credit risk on the financial instrument improves so that the financial asset is no longer credit-impaired and the improvement can be related objectively to an event occurring after the aforementioned method was applied, the Company, in subsequent reporting periods, calculate the interest revenue by applying the effective interest rate to the gross carrying amount.

#### **FOREIGN CURRENCIES**

In preparing the financial statements of the Company, transactions in currencies other than the Functional Currency of the Company (foreign currencies) are recognized at the rates of exchanges prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are recognized in profit or loss in the period in which they arise.

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

#### **TAXATION**

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

A provision is recognised for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is based on the judgement of tax professionals supported by previous experience in respect of such activities and in certain cases based on specialist independent tax advice.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from (i) initial recognition of goodwill; or (ii) initial recognition of assets and liabilities in a transaction that is not a business combination, and at the time of the transaction affects neither accounting nor taxable profit, and does not give rise to equal taxable and deductible temporary differences.

Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled, or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

#### Offsetting

Current tax assets and liabilities are offset when there is a legally enforceable right to set off the recognised amounts and the company intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and they relate to income taxes levied by the same taxation authority.

#### **CASH AND CASH EQUIVALENT**

Cash and cash equivalents comprise cash on hand, deposits with maturity less than 3 months and bank balances, restricted cash, that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

**5 CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY**

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities at the end of each reporting period. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

*Critical judgements in applying the Company's accounting policies*

Management is of the opinion that the application of judgement is not expected to have a significant effect on the amounts recognised in the financial statements, except as follows:

Significant increase of credit risk

ECL is measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for assets for Stage 2 and Stage 3 assets. An asset moves to Stage 2 when its credit risk has increased significantly since initial recognition. IFRS 9 does not define what constitutes a significant increase in credit risk.

In assessing whether the credit risk of an asset has significantly increased, the Company takes into account reasonable and supportable qualitative and quantitative factors and forward looking information. In line with regulatory guidelines, customers' utilisation of relief measures due to economic impact does not automatically result in significant increase in credit risk and a transfer to Stage 2. The assessment of customers' risk of default continues to be performed holistically, taking into consideration the customers' ability to make payments based on the rescheduled payments and their creditworthiness in the long term.

Models and assumptions used

The Company uses roll-rate models and assumptions in estimating ECL. Under roll-rate model, ECL are determined by using historical trends in credit quality indicators such as delinquency rates. Judgement is applied in identifying the most appropriate model for each type of asset, as well as for determining the assumptions used in the model, including past model adjustments and assumptions that relate to key drivers of credit risk.

*Key sources of estimation uncertainty*

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below:

Provision for expected credit losses of loan receivables

The following are key estimations that the management has used in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in financial statements:

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

- Establishing the number and relative weightings of forward-looking scenarios for each type of product/customer segment and determining the forward-looking information relevant to each scenario: When measuring ECL, the Company uses reasonable and supportable forward-looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.
- Probability of default: PD constitutes a key input in measuring ECL. PD is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.
- Loss Given Default: LGD is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

The economic uncertainties have imposed a greater degree of judgement in estimating the ECL and the inputs used are inherently subject to change, which may materially change our estimate of Stage 1 and Stage 2 allowance for credit losses in future periods.

To address the uncertainties inherent in the current and future environment and to reflect all relevant risk factors not captured in our modelled results, we applied expert credit judgement in determining significant increases in credit risk since origination and our probability weighted allowance for credit losses. We applied quantitative and qualitative adjustments for the impacts of the macroeconomic scenarios.

<b>Financial liabilities</b>		
Financial liabilities at amortized cost	<u>11,567,462</u>	<u>2,273,928</u>

#### Fair value of financial assets and financial liabilities

The carrying amounts of cash, loan and advance receivables, other receivable, and trade and other payables approximate their respective fair values due to the relatively short-term maturity of these financial instruments.

#### Financial risk management policies and objectives

The Company's activities expose it to a variety of financial risks from its operations. The key financial risks include credit risk and liquidity risk. There has been no change to the company's exposure to these financial risks or the manner in which these risks are managed and measured from 2023 to 2024.

#### **(a) Credit risk management**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's receivables from customers.

The carrying amounts of financial assets represent the maximum credit exposure.

During the years ended December 31, 2024 and 2023, the Company recognised impairment loss on loans and advances to customers amounting to US\$16,152,758 and US\$20,239,551 respectively.

##### (i) Loan and advances to customers

The exposure to credit risk mainly relates to loans to individual customer through the Company's lending activities.

The Company closely monitors credit quality for these loans to manage and evaluate the Company's exposure to credit risk. Credit risk management begins with initial credit assessment and continues through to full repayment of a loan. To assess a borrower who requests a loan, the Company, among other indicators, internally developed risk models using detailed information from internal historical experience including the borrower's prior repayment history with the Company as well as other measures. The Company uses delinquency status and trends to assist in making new and ongoing credit decisions, adjust models, plan collection practices and strategies.

There is no concentration of credit risk for loan receivables.

Loss rates are calculated using methods based on the probability of a receivable progressing through successive stages of delinquency to write-off.

##### (ii) Cash

## **HYP A MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

As of December 31, 2024 and 2023, the Company held deposits with banks of US\$1,103,752 and US\$1,533,845 respectively. These amounts are held with reputable banks. Impairment on cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that its cash and cash equivalents have low credit risk based on external credit ratings of the counterparties.

(iii) Other receivables

Amount due from related company is considered to have low credit risk because the related company has strong financial capacity to meet the contractual obligation. Accordingly, the company has applied the practical expedient under IFRS 9 to measure the loss allowance at an amount equal to 12-month ECL and has determined the amount to be immaterial.

Other receivables are considered to have low risk of default as they are not due for payment at the end of the reporting period and there has been no significant increase in credit risk since initial recognition, as the company has not identified any indications of adverse changes in business, financial or economic conditions that are expected to cause a significant change in the counterparty's ability to meet its repayment obligations. The loss allowance is measured at an amount equal to 12-month ECL and is determined to be immaterial.

**(b) Liquidity risk management**

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's objective when managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company manages liquidity risk by maintaining adequate reserves and continuously monitoring forecast and actual cash flows. The Company finances its working capital through loans from related and third parties and cash flow generated from operation.

All of the Company's financial liability are repayable on demand or due within 1 year as of December 31, 2024 and 2023.

Capital management policies and objectives

The company manages its capital to ensure that it will be able to continue as a going concern.

The company's overall strategy remains unchanged from 2023. The capital structure of the company consists of net debt and equity of the company. Equity includes share capital and accumulated profits.

The company is not subject to any externally imposed capital requirements.

## **HYPA MIND PTE. LTD.**

### **NOTES TO FINANCIAL STATEMENTS**

#### **17 SUBSEQUENT EVENTS**

The Company evaluated subsequent events and transactions that occurred after the balance sheet date through September 29, 2025, the date of issuance of these financial statements. The Company did not identify any other subsequent events that would have required adjustment or disclosure in the financial statements.
