

UAB Moment Credit

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2024 PREPARED IN
ACCORDANCE WITH
INTERNATIONAL FINANCIAL REPORTING STANDARDS
AS ADOPTED BY THE EUROPEAN UNION,
PRESENTED TOGETHER WITH THE INDEPENDENT AUDITOR'S REPORT

INDEPENDENT AUDITOR'S REPORT**TO THE SHAREHOLDERS OF UAB MOMENT CREDIT****Report on the Audit of the Financial Statements****Opinion**

We have audited the financial statements of UAB MOMENT CREDIT (the Company), which comprise the statement of financial position as at December 31, 2024, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of material accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects of the financial position of the Company as at December 31, 2024, and (of) its financial performance and its cash flows for the year then ended in accordance with the International Financial Reporting Standards as adopted by the European Union.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the requirements of the Law on Audit of Financial Statements and Other Assurance Services of the Republic of Lithuania that are relevant to audit in the Republic of Lithuania, and we have fulfilled our other ethical responsibilities in accordance with the Law on Audit of Financial Statements and Other Assurance Services of the Republic of Lithuania and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the International Financial Reporting Standards as adopted by the European Union, and for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We shall communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The Company's management authorised these financial statements on 1 July, 2025. The shareholders of the Company have a statutory right to either approve these financial statements or not approve them and require the management to prepare a new set of financial statements.

2 Summary of significant accounting policies

The main accounting principles adopted in preparing the Company's financial statements for 31 December 2024 are as follows:

2.1. Compliance confirmation

These financial statements are prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the European Union (EU).

2.2. Basis for preparation of financial statements

The Company's financial statements have been prepared on the historical cost basis, except for preferred shares and other investments.

Adoption of new and/or amended IFRS and International Financial Reporting Interpretations Committee (IFRIC) interpretations

In the current year, the Company has adopted all of the new and revised Standards and Interpretations that are relevant to its operations and effective for accounting periods beginning on 1 January 2024:

- a) ***Standards, their amendments and interpretations effective for annual periods beginning on or after 1 January 2024.***

Amendments to IAS 1: Classification of Liabilities as Current or Non-current and Classification of Liabilities as Current or Non-current - Deferral of Effective Date (issued on 23 January 2020, effective from 1 January 2024)

The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of financial position debt and other liabilities with an uncertain settlement date should be classified as current or non-current. The amendments affect the presentation of liabilities in the statement of financial position and do not change existing requirements around measurement or timing of recognition of any asset, liability, income or expenses, nor the information that entities disclose about those items. Also, the amendments clarify the classification requirements for debt which may be settled by the company issuing own equity instruments.

The amendments in Non-current Liabilities with Covenants (Amendments to IAS 1) (issued on 31 October 2022, effective from 1 January 2024):

Modify the requirements introduced by Classification of Liabilities as Current or Non-current on how an entity classifies debt and other financial liabilities as current or non-current in particular circumstances: only covenants with which an entity is required to comply on or before the reporting date affect the classification of a liability as current or non-current. In addition, an entity has to disclose information in the notes that enables users of financial statements to understand the risk that non-current liabilities with covenants could become repayable within twelve months. The amendments are applied retrospectively in accordance with IAS 8 and earlier application is permitted. The amendments do not have a material impact on the Group's/Company's financial statements

Amendments to IFRS 16 Lease Liability in a Sale and Leaseback with amendments that clarify how a seller-lessee subsequently measures sale and leaseback transactions that satisfy the requirements in IFRS 15 to be accounted for as a sale (issued on 22 September 2022, effective from 1 January 2024):

Lease Liability in a Sale and Leaseback (Amendments to IFRS 16) requires a seller-lessee to subsequently measure lease liabilities arising from a leaseback in a way that it does not recognise any amount of the gain or loss that relates to the right of use it retains. The new requirements do not prevent a seller-lessee from recognising in profit or loss any gain or loss relating to the partial or full termination of a lease. A seller-lessee applies the amendments retrospectively in accordance with IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to sale and leaseback transactions entered into after the date of initial application. The amendments do not have a material impact on the Group's/Company's financial statements

Amendments to IAS 7 and IFRS 7 Supplier Finance Arrangements (issued on May 2023, effective from 1 January 2024):

Supplier Finance Arrangements amends IAS 7 Statement of Cash Flows to require an entity to provide additional disclosures about its supplier finance arrangements. The amendments also add supplier finance arrangements as

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

an example within the liquidity risk disclosure requirements of *IFRS 7 Financial Instruments: Disclosures*. The amendments do not have a material impact on the Group's/Company's financial statements

b) Standards and amendments that have been approved but are not yet effective and have not been applied in advance

Amendments to IAS 21 Lack of Exchangeability (issued on August 2023, effective from 1 January 2025, early application is possible):

Lack of Exchangeability amends IAS 21 The Effects of Changes in Foreign Exchange Rates to require an entity to apply a consistent approach to assessing whether a currency is exchangeable into another currency and, when it is not, to determining the exchange rate to use and the disclosures to provide.

The Company has not yet evaluated the impact of the implementation of these amendments.

Contracts Referencing Nature-dependent Electricity – Amendments to IFRS 9 and IFRS 7 (issued on 18 December 2024, effective from 1 January 2026 with early application permitted)

The amendments are to the own-use requirements, and hedge accounting requirements, together with related disclosures. The scope of the amendments is narrow, and only if contracts meet the specified scoping characteristics will they be in the scope of the amendments.

The amendments include - clarifying the application of the 'own-use' requirements; permitting hedge accounting if these contracts are used as hedging instruments; and adding new disclosure requirements to enable investors to understand the effect of these contracts on a company's financial performance and cash flows.

Amendments to IFRS 9 Financial Instruments

- the own-use requirements in IFRS 9 are amended to include the factors an entity is required to consider when applying IFRS 9:2.4 to contracts to buy and take delivery of renewable electricity for which the source of production of the electricity is nature-dependent; and
- the hedge accounting requirements in IFRS 9 are amended to permit an entity using a contract for nature-dependent renewable electricity with specified characteristics as a hedging instrument:
 - to designate a variable volume of forecast electricity transactions as the hedged item if specified criteria are met; and
 - to measure the hedged item using the same volume assumptions as those used for the hedging instrument.

Amendments to IFRS 7 Financial Instruments: Disclosures and IFRS 19 Subsidiaries without Public Accountability: Disclosures

The IASB amends IFRS 7 and IFRS 19 to introduce disclosure requirements about contracts for nature-dependent electricity with specified characteristics

The amendments are effective for annual reporting periods beginning on or after 1 January 2026. Early application is permitted.

The amendments shall be applied retrospectively; prior periods need not be restated to reflect the application of the amendments

The Company has not yet evaluated the impact of the implementation of these amendments.

Annual Improvements Volume 11 (issued on 18 July 2024 effective from 1 January 2026, earlier application is permitted)

These amendments include clarifications, simplifications, corrections and changes aimed at improving the consistency of several IFRS Accounting Standards. The amendments contained in the Annual Improvements relate to:

- IFRS 1 *First-time Adoption of International Financial Reporting Standards* - Hedge Accounting by a First-time Adopter
- IFRS 7 *Financial Instruments: Disclosures*:
 - Gain or loss on derecognition

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

- Disclosure of differences between the fair value and the transaction price
 - Disclosures on credit risk
- IFRS 9 *Financial Instruments*:
 - Derecognition of lease liabilities
 - Transaction price
- IFRS 10 *Consolidated Financial Statements* - Determination of a 'de facto agent'
- IAS 7 *Statement of Cash Flows* - Cost Method.

These amendments are mandatory for financial years beginning on or after 1 January 2026; earlier application is permitted.

The Company has not yet evaluated the impact of the implementation of these amendments.

Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7 (issued on 30 May 2024 effective from 1 January 2026; earlier application is permitted)

Clarifying the classification of financial assets with environmental, social and corporate governance (ESG) and similar features—ESG-linked features in loans could affect whether the loans are measured at amortised cost or fair value. Stakeholders asked how to determine how such loans should be measured based on the characteristics of the contractual cash flows. To resolve any potential diversity in practice, the amendments clarify how the contractual cash flows on such loans should be assessed.

Settlement of liabilities through electronic payment systems—stakeholders highlighted challenges in applying the derecognition requirements in IFRS 9 to the settlement of a financial asset or a financial liability via electronic cash transfers. The amendments clarify the date on which a financial asset or financial liability is derecognised. The IASB also decided to develop an accounting policy option to allow a company to derecognise a financial liability before it delivers cash on the settlement date if specified criteria are met.

With these amendments, the IASB has also introduced additional disclosure requirements to enhance transparency for investors regarding investments in equity instruments designated at fair value through other comprehensive income and financial instruments with contingent features, for example features tied to ESG-linked targets.

The amendments are effective for annual reporting periods beginning on or after 1 January 2026. Earlier application of either all the amendments at the same time or only the amendments to the classification of financial assets is permitted.

An entity is required to apply the amendments retrospectively. An entity is not required to restate prior periods to reflect the application of the amendments, but may do so if, and only if, it is possible to do so without the use of hindsight.

The Company has not yet evaluated the impact of the implementation of these amendments.

IFRS 18 Presentation and Disclosure in Financial Statements (issued on 9 April 2024 effective from 1 January 2027)

IFRS 18 introduces new requirements on presentation within the statement of profit or loss, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes.

The Company has not yet evaluated the impact of the implementation of this standard.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

2.3. Currency of the financial statements

The amounts in these financial statements are presented in the national currency of the Republic of Lithuania, Euro (EUR). The rounding is made to EUR thousand, unless stated otherwise. The functional currency of the Company is Euro.

2.4. Intangible assets

Separately acquired intangible assets are carried at cost at the time of acquisition. Subsequently, intangible assets are carried at acquisition cost less accumulated amortisation and accumulated impairment losses. Intangible assets may or may not have a finite useful life. Intangible assets with finite lives are amortised over the useful economic lives not longer than 7 years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation periods for intangible assets with finite useful lives are reviewed at the end of each financial year.

Intangible assets with indefinite useful lives are not amortised but are assessed for impairment either individually or as a cash-generating unit. The useful lives of intangible assets with indefinite useful lives are reviewed annually to determine whether the useful life is still indefinite. In 2024 and 2023, the Company did not have any intangible assets with indefinite useful lives.

Intangible assets that are constructed are recorded at cost at the time of initial recognition, which is mainly attributable to directly attributable wage costs. Subsequent measurement is the same as for separately acquired intangible assets.

2.5. Property, plant and equipment

Property, plant and equipment are carried at cost, excluding maintenance costs, less accumulated depreciation and accumulated impairment. The acquisition cost includes the replacement of part of the asset if this meets the criteria for recognition as a fixed asset.

Parts of some items of property and equipment may be replaced on a regular basis. In accordance with the principles of fixed asset recognition, The Company recognises the cost of replacing such parts of a fixed asset as an item of property, plant and equipment when incurred, provided that it meets the criteria for recognition as a property, plant and equipment.

Tangible fixed assets are written off when they are sold or when no further economic benefit is expected from their use or sale. Any gain or loss appearing from the write-off of property and equipment (calculated as the difference between net sales and the carrying value of the assets) are accounted for in the statement of comprehensive income for the reporting year, when assets are written-off.

Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Computers and communication equipment	3 years
Furniture	6 years
Vehicles	6 years
Other assets	4 years

The useful lives are reviewed periodically to ensure that the period of depreciation is consistent with the expected useful life of the property, plant and equipment.

2.6. Financial assets and financial liabilities

The Company recognises a financial asset in the statement of financial position when, and only when, the Company becomes a party to the transaction based in the terms of the financial instrument contract.

As at 31 December 2024 and 2023, The Company's financial assets consisted of assets classified as loans and other receivables, as well other assets and receivables from related parties (membership shares and preferred shares).

Initial recognition and measurement

Financial assets are classified on initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI) or fair value through profit or loss.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. These assets, except for trade receivables that do not have a significant financing component, are initially measured by the Company at fair value plus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs.

For a financial asset to be designated and measured at either amortised cost or fair value through other comprehensive income, the cash flows arising from the financial asset only be payments of principal and interest (SPPI) on the principal amount outstanding. This assessment is known as the SPPI test and is performed for each financial instrument.

The financial asset management model specifies how financial assets are managed to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

A regular way purchases or sales of financial assets are accounted for at trade date, i.e., the date that the Company commits to purchase or sell the financial asset. Loans and other receivables are recognised in the statement of financial position at their pay-out date.

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans received and payables. All financial liabilities are recognised initially at fair value and, in the case of loans received and payables, net of directly attributable transaction costs. The Company's financial liabilities include trade and other payables, loans received, including bank overdrafts and lease liabilities.

After initial recognition, loans and other payables are carried at amortised cost using the effective interest method (EIR). Gains and losses are recognised in the statement of comprehensive income, when the liabilities are written off or amortised.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of comprehensive income.

Subsequent measurement

After initial recognition, the Company measures financial assets at:

- Amortised cost (debt instruments);
- Fair value through OCI with recycling of cumulative gains and losses upon derecognition into profit or loss (debt instruments). The Company did not have such items as at 31 December 2024 and 2023.
- Fair value through OCI with no recycling of cumulative gains and losses upon derecognition into profit or loss (debt instruments). The Company did not have such items as at 31 December 2024 and 2023;
- Fair value through profit or loss (membership shares and preferred shares).

Financial asset at amortised cost (debt instruments)

This category is the most relevant to the Company. The Company measures financial assets at amortised cost, if the two conditions are met:

- financial assets are held within the business model whose objective is to hold financial assets to collect their contractual cash flows; and
- the contractual terms of financial assets give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are measured using the effective interest rate (EIR) method less impairment losses. EIR is the rate that exactly discounts estimated future cash flows over the expected life of the financial instrument or, if needed shorter period to the net carrying amount of the financial asset. EIR (and therefore and amortised cost of financial asset) is calculated by taking into account all acquisition discounts, fees and expenses that are an integral part of the EIR.

The Company recognises interest income on loans using the rate of return that is the best estimate of the constant rate of return over the expected life of the loan. There is an assessment of the potential impact of different interest rates at different stages and the life cycle characteristics of the product (including prepayments, interest and fees). If taxes are reviewed due to the financial asset's cash flow for reasons other than credit risk, such adjustment is included in the statement of comprehensive income as a positive or negative adjustment to the carrying amount of the asset by increasing or decreasing the interest income accordingly. Gain or loss is recognised in the statement of comprehensive income when the asset is derecognised, modified or impaired.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

Financial assets or financial liabilities assessed at fair value through profit or loss

Financial assets such as preferred shares and other investments (equity instruments) are measured at fair value and are attributable to the category of financial assets at fair value through profit or loss. Financial assets or financial liabilities are initially accounted for at acquisition cost and are subsequently revalued at the fair value, which is market price or other reasonable estimates. Related profit or loss on revaluation is charged directly to the statement of profit or loss. Interest and dividend income, and interest expense on financial assets or financial liabilities are recognised as interest income and expense and dividend income respectively.

Financial assets and financial liabilities classified in this category are designated by management on initial recognition when the following criteria are met:

- the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them on a different basis;
- the assets and liabilities are part of a group of financial assets, financial liabilities or both which are managed and their performance evaluated on a fair value basis in accordance with a documented risk management or investment strategy;
- the financial instrument contains an embedded derivative, unless the embedded derivative does not significantly modify the cash flows or it is clear, with little or no analysis, that it would not be separately recorded.

Gains or losses arising from the remeasurement of such financial assets or financial liabilities are recognised immediately in profit or loss. Interest and dividend income or interest expense on financial assets or financial liabilities shall be recorded in interest and dividend income or interest expense, respectively.

The Company had these types of financial assets and financial liabilities in 2024. Note 17 presents the measurement of financial assets and financial liabilities.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the asset have expired; or
- The Company has transferred its rights to the cash flows of the financial asset, or has retained the right to the cash flows but has assumed an obligation to pay the full amount to a third party in accordance with the transfer agreement within a short period of time; and
- the Company either (a) has transferred substantially all the risks and rewards of the ownership of the financial asset, or (b) has neither transferred nor retained the risks and rewards of ownership of the financial asset, but transferred control of the asset.

When the Company has transferred the rights to the cash flows of an asset but has not transferred the risks, rewards and control of ownership of the asset, the asset is recognised to the extent of the Company's involvement with it. When the transfer of an asset that is related to the Company becomes a guarantee, the relationship with the related asset is measured at the lower of the amount of the asset and the maximum amount of the guarantee that the Company would have to pay.

When a transfer of an asset related to the Company becomes a put or call option to acquire the transferred asset, the relationship is measured at the amount that the entity can repurchase. However, if a put option is written on a transferred asset that is measured at fair value, then the entity's relationship is measured at the lower of the fair value of the transferred asset and the exercise price of the option.

A financial liability is derecognised when it is settled, cancelled or expires.

When an existing financial liability to the same creditor is replaced by another financial liability with substantially different terms, or the terms of an existing liability are substantially modified, such modifications are recognised as a derecognition of the existing liability and the recognition of a new liability, with the difference between the two recognised in the statement of comprehensive income.

Details on impairment of financial assets are presented in Note 2.20. Loan measurement and provisioning.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

2.7. Fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability, or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Valuations are performed by the Company's management at each reporting date. For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of asset or liability and the level of the fair value hierarchy.

The management's fair value evaluation is disclosed in Note 17.

2.8. Lease

At inception of a contract, the Company assesses whether the contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of an asset held under a right-of-use basis includes the amount of the initial measurement of the lease liability, the initial direct costs, and the lease payments at or before the commencement date, less any lease incentives received. The following describes how depreciation of assets held under right-of-use is calculated over the lease term using the straight-line method:

- Rent of premises from 2 to 3 years
- Vehicles and other equipment from 2 to 5 years

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

If the Company transfers ownership of the leased asset before the end of the lease term, or if the cost of the right-of-use asset reflects the lessee's exercise of the option to purchase, depreciation is provided based on the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. For more on accounting policies refer to Section/Note 'Lease'.

Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option if it is reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company applies the borrowing rate at the commencement date for those leases for which the contractual interest rate is not readily determinable, for other leases the contractual interest rate is applied. After the commencement date, the amount of the lease liability is increased by the increase in the interest rate and reduced by the amount of lease payments made. In addition, the carrying amount of the lease liability is remeasured if certain adjustments are made, the lease term or lease payments change (e.g. changes in future payments due to a change in the index or rate used to determine such lease payments), or the valuation of the option to purchase the leased asset changes.

The Company's lease liabilities are accounted for under 'Lease liabilities' (see Note 9).

Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

2.9. Impairment of other assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use. The recoverable amount is determined for an individual asset, except for the cases, when asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognised in the statement of comprehensive income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount. This increased value cannot exceed the carrying amount of the asset (after depreciation) that would have existed if the impairment had never been recognised in the past. A reversal of an impairment loss is recognised in the statement of comprehensive income unless the asset is carried at revalued amount, in which case the reversal is accounted for as an increase in the revaluation surplus. After such a reversal, the depreciation rate, if any, is adjusted to allocate the difference between the recovered carrying amount and the asset's residual value over the asset's estimated future remaining useful life.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

2.10. Cash and cash equivalents

Cash includes cash on hand and cash at banks. Cash equivalents are short-term, highly liquid investments that are easily convertible to known amounts of cash. Such investments mature in less than three months and are subject to insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents consist of funds in current accounts.

2.11. Provisions

Provisions are recorded when, and only when, the Company has a legal obligation or an irrevocable commitment as a result of a past event, it is probable that resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Provisions are reviewed at each statement of financial position date and adjusted to reflect the best current estimate. Where the effect of the time value of money is material, the amount of the provision is the present value of the expenditure that is expected to be required to settle the obligation. Where discounting is used, the increase in the provision to reflect the passage of time is recorded as interest expense.

2.12. Income taxes

Income tax charge is based on profit for the year and considers deferred taxation. Calculation of income tax is based on requirements of the Lithuanian regulatory legislation on taxation.

The standard income tax rate applied in the Republic of Lithuania was 15%.

Tax losses can be carried forward for indefinite period, except for the losses incurred as a result of disposal of securities and/or derivatives. Such carrying forward is disrupted if the Company ceases its activities due to which these losses incurred except when the Company ceases its activities due to reasons which do not depend on the entity itself. Losses on the disposal of securities and/or derivatives can be incurred for a period of 5 years and can only be covered by profits from transactions of the same type.

With effect as from 1 January 2014, tax losses available for carry forward can be used to reduce taxable income of the current tax year by maximum 70%.

Deferred taxes are calculated using liability method. Deferred tax reflects the net tax effect of temporary differences between the carrying amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are measured at the tax rate that is expected to apply in the period in which the asset is realised or the liability settled, taking into account tax rates enacted or substantively enacted at the statement of financial position date.

Deferred tax asset has been recognised in the statement of financial position only to the extent the management believes it will be realised in the foreseeable future, based on taxable profit forecasts. If it is probable that part of the deferred tax will not be realised, that part of the deferred tax is not recognised in the financial statements.

2.13. Revenue recognition

Revenue is recognised when it is probable that the economic benefits associated with the transaction will flow to the Company and the amount of the revenue can be measured reliably. Revenue is accounted for on accrual basis when it is earned.

Interest income on consumer credits is recognised on accrual basis with regard to the balance of debt and the effective interest rate. When calculating the effective interest rate, the Company measures cash flows considering all the credit contract terms but does not take into account future credit loss. The calculation includes all fees and other amounts the contractual parties paid (will pay) or received (will receive) from each other, which are an integral part of the actual interest rate, as well as all commission fees or discounts.

In a case of late payment, the customer covers losses incurred by the Company, which consist of the Company's loss of earnings (loss). These earnings are recognised in the statement of comprehensive income under interest income when paid by the customer.

Income from other services is recognised when the transaction is completed or when its fulfilment degree may be reliably measured prior to the date of statement of financial position.

IFRS 15 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

IFRS 15 requires entities to make judgements and decisions that take into account all relevant facts and circumstances when applying each step of the model to contracts with their customers. The Standard also specifies the accounting for incremental costs associated with entering into a contract and costs directly attributable to the performance of the contract. Management has performed an assessment of the impact of applying the standard and considers that there is no material impact on the financial statements in the context of the ongoing operations.

2.14. Expense recognition

Expenses are recognised on an accruals and comparative basis in the period in which the related income is earned, irrespective of when the cash is spent. Where an expense incurred in an accounting period cannot be directly attributed to the generation of specific revenue and will not generate revenue in future periods, the expense is recognised as an expense in the period in which it is incurred.

The amount of the expense is generally measured at the amount of cash paid or payable, excluding VAT. In cases where there is a long settlement period and interest is not earned, the amount of the expense is estimated by discounting the settlement amount at the market interest rate.

2.15. Foreign currencies

Transactions denominated in foreign currencies are accounted for at the official exchange rate prevailing at the date of the transaction. Gains and losses arising from such transactions and from the revaluation of foreign currency denominated assets and liabilities balances at the balance sheet date are recorded in the statement of comprehensive income. Such balances are revalued at the closing exchange rate.

2.16. Use of estimates in the preparation of financial statements

The preparation of financial statements in conformity with International Financial Reporting Standards requires the management to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingencies. The significant areas of estimation used in the preparation of the accompanying financial statements relate to amortisation (Notes 2.4 and 6), depreciation (Notes 2.5, 7 and 9), deferred income tax (Note 16), measurement of financial instruments (Note 17), loans granted to related parties (Note 19), impairment (Note 4) and provisions (Note 21) evaluations. Future events may occur which may cause the assumptions used in arriving at the estimates to change. The effect of any changes in estimates will be recorded in the financial statements when determinable. The management has made an assessment of the preference shares. Preference shares issued (Note 12) and acquired (Note 17) are held as equity instruments, because, in the opinion of management, it meets the criteria for an equity instrument and does not meet the criterion of an obligation to settle the asset/liability acquired in cash or another financial asset.

2.17. Contingencies

Contingent liabilities are not recognised in the financial statements. They are disclosed in the financial statements unless the possibility of loss of resources embodying economic benefits is remote.

A contingent asset is not recognised in the financial statements but disclosed when an inflow or economic benefits is probable.

2.18. Events after the reporting period

Events after the reporting period that provide additional information about the Company's position at the statement of financial position date (adjusting events) are reflected in the financial statements. Events after the statement of financial position date that are not adjusting events are disclosed in the notes when material.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

2.19. Offsetting

When preparing the financial statements, assets and liabilities, as well as revenue and expenses are not set-off, unless required or permitted by a specific IFRS.

2.20. Loans measurement and provisioning

The Company regularly reviews its loans and receivables to assess impairment. Loan measurement is a continuous process consisting of the initial valuation of loans and the subsequent valuation of loans (at the end of the reporting period). Loans measurement and provisioning is based on a three stage model taking into account credit risk changes of loans. The Company assesses whether or not there is any indication that loans may be impaired. The calculation of impairment for loans is based on the expected credit loss method.

Stage 1 applies to all loans for which no significant increase in credit risk has been observed after initial recognition of the asset. Stage 1 exposures are subject to a 12-month probability of default. At the end of each reporting period, the Company assesses whether the credit risk of the loan has significantly increased since the initial recognition based on the Company's available customer data, taking into account the criteria of Stages 2 and 3.

Stage 2 applies to loans with a significant increase in credit risk. This is the loan valuation stage, where a significant decrease in the loan value is recorded, i.e. significant change in the lifetime probability of default for a loan period. In the event that the following conditions are met, a significant increase in credit risk is recognised regardless of the results of the quantitative measurement: (i) payments are in delay from 31 to 90 days; or (ii) financial asset (loan) is under supervision; or (iii) financial assets are subject to a change of terms when, due to the borrower's financial difficulties, the terms of the loan are reviewed and relieved.

Stage 3 applies to loans under which the resulting liabilities are in default and, therefore, the Company is exposed to lifetime credit losses and allowance is recognised. Thus, if the quality of the Loan of Stage 2 continues to deteriorate, the loan is transferred to Stage 3. The loan is transferred to Stage 3 if the following conditions are met: (i) payments are in delay for more than 90 days; or (ii) credit agreement is terminated, regardless the reasons; or (iii) the debtor is dead; or (iv) the debtor is declared bankrupt.

Loans from stage 3 can return to stage 2 only when all overdue payments have been made and the loan is not overdue more than 90 days at the time of assessment. Loans from stage 3 and stage 2 can return to stage 1 only if in the last 6 months they were not more than 30 days late.

For credit risk control and management purposes, as well as for loan measurement and provisioning, the Company evaluates the following credit risk components:

- **Probability of default (PD).** The Company constantly assesses the probability of default (PD) of the Company's debtors, which indicates the likelihood that the debtor will not fulfil its obligations within the next 12 months or during the entire term of the Credit Agreement. They are calculated on the basis of historical data. To determine the probability of default, the Company does not use the rating/segmentation method.

- **Loss given default (LGD)** LGD indicator shows the expected loss of the Company if the debtor defaults, i.e. LGD indicates the amount of loss, provided that the debtor has defaulted (PD = 100%). The discounted cash flow model is used to calculate the LDG indicator.

- **Exposure at default (EAD)** The EAD indicator shows the likely size of the borrower's liability to the Company at the time of default. The EAD for Loans of Stage 1 reflect the expected exposure value over the next 12 months. The EAD for loans of Stage 2 reflect the present value of debt and the assumptions about using off-balance sheet credit liabilities. The EAD for loans of Stage 3 is equivalent to the sum of the balance sheet and off-balance sheet value.

Multiplication of indicators PD, LGD, EAD estimates the expected credit loss (EL or ECL), i. e. what average of the loss the Company would be expected to incur if a debtor defaulted on the Company.

$$PD \times LGD \times EAD = ECL$$

Where:

PD – probability of default – it provides an estimate of the likelihood that a debtor will be unable to meet its debt obligations;

LGD – loss given default – is the amount of loss, incurred by the Company when a debtor defaults;

EAD – exposure at default – is the expected size of the exposure in the event of default.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

Correction of ECL based on forecast (Prospective information). The Company's default probabilities include prospective information. The Company converts its historical data into data reflecting a particular economic situation ('point in time') using models based on expected economic development scenarios.

The key economic variables analysed by the Company are inflation and wage developments. The influence of economic variables on probability of default is determined by statistical regression analysis. Expert assessment is also involved in the process. In order to incorporate the influence of economic variables, the Company uses 4 economic scenarios (main, optimistic, pessimistic, unfavourable) which results to the overall scenario, with regard to the probabilities and weights assigned. These probabilities are based on the assessment of the Company's management, but the aim is that the chosen economic variables in general would correspond to the forecasts published by the institutions (e.g. the Bank of Lithuania, the Ministry of Finance of the Republic of Lithuania, etc.).

The assumptions underlying the ECL calculations are reviewed periodically (at least once a year) and the models used in the ECL calculations are back tested against actual data. Models are adjusted as needed.

Expected credit losses on loans carried at amortised cost are recorded in the impairment accounts and form an integral part of the carrying amount of those assets in the statement of financial position. Impairment losses reduces the total carrying amount of the asset.

The carrying amount of loans is reduced through the use of an impairment account and the amount of the impairment loss is recognised in profit or loss. After initial recognition, lending exposures are reviewed, and a detailed assessment of changes in the client's risk profile is carried out at least annually to identify increases in the materiality of credit risk. On a monthly basis, an assessment is made of the indicators of impairment/increase in credit risk of the lending exposure, which are used to reverse or increase the previously recognised impairment by adjusting the impairment account. Impairment losses related to the initial application of IFRS 9 are recorded directly through equity.

Write-offs

When loans and other receivables are not probable of recovery, they are written off against the impairment of loans and other receivables. The decision to write off loans and other receivables is made by the Company's management. When loans and other receivables previously written off are recovered, the proceeds are recognised in profit or loss.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

3 Cash and cash equivalents

Cash and cash equivalents categorised by ratings of the banks and their parents in which deposits are held (based on Fitch ratings or ratings of a similar international rating agency) are as follows: Cash and cash equivalents, excluding cash on hand

	As at 31 December 2024	As at 31 December 2023
Rating 'A'	136	194
Total	136	194

As at 31 December 2024 and 2023, the Company had no pledged funds in bank accounts. There were no restrictions for the use of cash at banks.

4 Loans granted and receivables

Net loans granted were as follows:

	As at 31 December 2024	As at 31 December 2023
Loans granted and receivables	8.250	6.044
Impairment	(883)	(835)
	7.369	5.209

The company has sold part of the portfolio it manages and receives part of its proceeds. The residual value of the portfolio sold at 31 December 2024 was EUR 445 thousand (at 31 December 2023 – 1,321 thousand), the share of revenue received through 2024 years – 299 thousand, 2023 year – 647 thousand.

The Company also made purchases of non-performing loans which are 90-180 days past due. Claims were purchased in 2024, with a value of EUR 132 thousand (429 thousand in 2023).

Loans granted are not classified into separate segments, as all the activity is carried out in the territory of the Republic of Lithuania. Consumer loans are only granted to private individuals, residents of the Republic of Lithuania; loans are granted in euros. As at 31 December 2024 and 2023, there were no pledges to secure loan repayment. As at 31 December 2024 and 2023, there were no off-balance sheet liabilities to issue a loan.

Change in value of loans and receivables is presented below:

	As at 31 December 2024	As at 31 December 2023
Impairment at the beginning of the period	836	795
Impairment (reversal) during the year	46	41
Impairment at the end of the period	882	836

All Company's loans are assessed collectively.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

In the statement of comprehensive income, impairment (reversals) of interest bearing assets consists of:

	As at 31 December 2024	As at 31 December 2023
Recovered written-off loans and receivables	-	-
Impairment (reversal) during the year	46	40

From one to five years	4.717	3.044
More than five years	-	-
Receivable consumer credit loans, net	7.369	5.209

Below is the structure of the Company's loans and receivables by expected repayment terms:

As at 31 December 2024

	On demand	Up to 1 month	1–3 mont hs	4–6 mont hs	7–12 month s	1–5 years	More than 5 years	Undefined terms*	Total
Loans granted and receivables	-	220	459	663	1,305	4,717	-	5	7,369

As at 31 December 2023

	On demand	Up to 1 month	1–3 mont hs	4–6 mont hs	7–12 month s	1–5 years	More than 5 years	Undefined terms*	Total
Loans granted and receivables	-	168	369	525	1,009	3,100	-	38	5,209

* The amounts presented in the column 'Undefined terms' include the amount of loans with at least one day overdue payment, other loans according the same agreements by attributing receivables/provided amounts to the certain groups based on repayment schedule as presented above.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

Credit quality according to the classes of financial assets

The Company manages its financial asset quality by applying internal credit assessment rules.

In assessing whether to grant credit to individuals the Company has implemented internal customer solvency rules, considering each customer's sustainable monthly income, available historical data, credit history, debt level and other social and economic criteria. After assessment of all the criteria, the decision is taken whether to grant the credit and possible crediting options are given to specific client.

The total loan portfolio is divided into risk groups based on the overdue payment terms. Reliable transactions are considered as low risk group, i.e. the customers are late with repayments up to 60 days. In this case, customers are required only to cover late repayments and losses. Higher risk groups are considered when customers are late with repayments from 60 to 180 days. High-risk group consists of customers, which are late with repayments for more than 180 days. Customers from this group are required to repay the whole credit loan immediately and all accumulated loss charges.

The table below provides distribution of impairment of loans granted by risk groups:

As at 31 December 2024

Asset class	Overdue loans				Total
	Not overdue loans	Low risk	Higher risk	High risk	
Loans to natural persons	5.724	1.189	410	46	7.369
Total	5.724	1.189	410	46	7.369

As at 31 December 2023

Asset class	Overdue loans				Total
	Not overdue loans	Low risk	Higher risk	High risk	
Loans to natural persons	4.054	816	299	40	5.209
Total	4.054	816	299	40	5.209

Distribution of loans before impairment in accordance with the loan valuation methodology established by the Company:

Net book value as at 31 December 2023	90	28	118

Set out below are the dynamics of carrying amounts of lease liabilities during the period (included under the caption 'Loan liabilities'):

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

	Buildings	Motor vehicles	Total
As at 31 December 2023	91	22	113
Additions	46	-	46
Interest charged	4	1	5
Lease payments (including incentives)	(48)	(13)	(61)
As at 31 December 2024	93	10	103
Current	45	9	54
Non-current	48	1	49

The following amounts are recognised in the statement of comprehensive income:

	2024	2023
Depreciation expenses (Depreciation and amortisation)	61	64
Interest expenses(under 'Finance income (costs)')	4	5
Lease expenses, total:	65	69

Future minimum lease payments under leases are as follows:

	As at 31 December 2024	As at 31 December 2023
Within one year	59	61
From one to five years	50	58
After five years	-	-
Total finance lease liabilities	109	119
Interest	(6)	(6)
Present value of finance lease liabilities	103	113
Finance lease liabilities are accounted for as:		
- current	54	57
- non-current	49	56

10 Trade payables

As at 31 December 2024, trade payables, compared to 31 December 2023, decreased by EUR 16 thousand and amounted to EUR 99 thousand. The balance of trade payables mainly consisted of payables for services provided (advertising, rent and maintenance of premises, data transfer services).

11 Other payables

As at 31 December 2024, other payables mainly consisted of employment related obligations (vacation accruals, social security taxes), prepayments from customers, and tax liabilities. The major part of amounts payable was short-term. As at 31 December 2023, other payables mainly consisted of employment related obligations, including prepayments received from customers for services to be rendered.

12 Capital and reserves

In 2024, the Company's issued capital remained the same.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

As part of equity management, the Company's management is continuously monitoring the Company's total equity, which cannot be less than 50% of its issued capital as specified in the Republic of Lithuania laws. The Company complied with this requirement in 2024 and 2023.

Legal reserve

The legal reserve is mandatory under the legislation of the Republic of Lithuania. Annual transfers of not less than 5% of net profit are required until the reserve reaches 10% of the issued capital. The Company is in compliance with this requirement and transfers 5% of net profit to the legal reserve annually. As at 31 December 2024 and 2023, the legal reserve was not fully formed.

13 Other operating expenses

	2024	2023
Development costs	-	-
Taxes (other than income tax)	7	7
IT and telecommunication expenses	39	36
Consulting, business trips and training expenses	69	87
Operating lease (vehicles), maintenance	34	47
Debt recovery expenses	-	-
Bank service expenses	11	10
Other	915	796
	1.075	983

14 Finance income

As at 31 December 2024 and 2023, financial operating income consisted of interest income calculated on receivables due from related parties (for related party receivables, see note 19) and income from assignment of claims and purchase of bad debts, i.e. the share of the proceeds of the assignment of claims and the proceeds of purchase of bad debts.

	2024 m.	2023 m.
Interest from related parties	74	129
Proceeds from assignments of claims and purchases of bad debts	365	862
Other income from financial and investment activities	-	-
Costs of financing and investment activities	(4)	(5)
	435	986

15 Other income (expenses)

	2024	2023
Gain on disposal of non-current assets	-	-
Other (expenses)	(75)	(77)
Other income	5	7
	(70)	(70)

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

16 Income taxes

As at 31 December 2024, the Company accrued 82 thousand of income taxes.

	2024	2023
Income tax for the reporting period	82	67
Change in deferred income tax	-	-
Income tax benefit (expenses) accounted for in the statement of comprehensive income	82	67

The Company has no accumulated tax losses as at 31 December 2024.

The Company has no recorded income tax assets at 31 December 2023.

17 Fair value of financial instruments

Loans and receivables. In determining the fair value of loans and receivables, the assessment was carried by discounting the future cash flows for each receivable throughout the whole period (Level 3 in fair value hierarchy). The fair value of all loans issued does not differ significantly from the carrying amount since interest rates correspond to market interest rates.

Financial borrowings and payables. Financial borrowings interest reflects market interest rates, thus their fair value approximates to their carrying value (Level 3 in fair value hierarchy).

Financial assets and financial liabilities. Where the fair values of financial assets and financial liabilities recorded on the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of the discounted cash flow (DCF) model. The input to these models is taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The factors such as liquidity risk, credit risk and changes in volatility require to make estimates. Changes in assumptions about these factors could affect the reported fair value of financial instruments. This valuation technique was applied in measuring the acquired preference shares, the fair value of which during the reporting period was considered equal EUR 4,566 thousand (see "1. General information"), and estimated fair value approximates their carrying amounts.

Description of additional measurement factors ("Other assets and receivables from related parties", "Equity"):

Significant additional measurement factors used in fair value measurement assigned to Level 3 in fair value hierarchy, together with a quantitative sensitivity analysis, are set out below (as at 31 December 2024):

	Valuation technique	Significant additional factors	Range	Sensitivity to fair value
Unlisted equity investments in securities – non-banking financial sector	Discounted cash flow (DCF) model	The impact of long-term growth on future cash flows (baseline – 2%)	1% –2.5%	Increase (decrease) in the long-term growth rate would increase (decrease) in fair value the amount of the fair value by EUR (53) thousand EUR / 26 thousand EUR.
		Long-term operating margin (baseline – 15,6%)	14,8% – 16,4%	Increase (decrease) in the long-term operating margin of fair the amount of the fair value EUR (41) thousand / 41 thousand EUR.
		(WACC baseline – 28.14%)	23% –33%	Increase (decrease) in WACC (decrease) / increase the fair value (1,335)/2,040 thousand EUR.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

18 Risk management, financial assets and liabilities

The Company's activities expose it to a variety of financial risks. Risk management is carried out by the Company's management. The Company applies the following key financial risk management procedures in its activities:

Credit risk

Credit risk is the risk that transaction parties may not comply with their liabilities that were agreed in the agreement. Constant procedures are carried out in the Company in order to assure that loans are granted to reliable customers and do not exceed an acceptable credit risk limits. Thus, the credit risk is managed before issuing the credit.

The Company does not guarantee obligations of other parties. Loans granted to customers, including related parties, are not secured by any means.

Maximum credit risk

The following table shows the maximum credit risk separation by statement of financial position notes. Maximum risk is disclosed net of impairment:

Items of the statement of financial position	Notes	As at 31 December 2024	As at 31 December 2023
Cash at banks	3	136	194
Loans granted and receivables	4	7.369	5.209
Prepayments	5	17	12
Other assets and receivables*	19, 20	8.721	9.078
Total		16.243	14.493

* The Company's management believes that deferred expenses included under current assets and receivables in the Company's statement of financial position do not create credit risk, thus they are not included in the above table of the total maximum exposure to the credit risk.

Maximum credit risk based on industry

Industry risk is related to receivables from customers, whose economic activity is the same or closely related. As the Company (excluding related parties) provides credits to individuals and the maximum amount of loan is only up to EUR 10 thousand, the Company avoids concentration of receivables.

For the accounts receivable from related parties see Note 19.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to cover its current liabilities or it will cover them in unfavourable circumstances by attracting additional financing or using the Company's assets. The Company's policy is to maintain sufficient amount of cash or cash equivalents or to ensure external financing by using bills and taking loans.

Table below presents summarise the Company's undiscounted financial liabilities grouped by contractual maturity dates:

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

Financial liabilities As at 31 December 2024	On demand	Up to 3 months	3–12 months	1–5 years	After 5 years	Undefined terms	Total
Liabilities to the shareholders and shareholder controlling persons	-	1	34	-	-	-	35

2023 As at 31 December	On demand	Up to 3 months	3–12 months	1–5 years	After 5 years	Undefined terms*	Total
Loans granted (including future interest)	-	1.168	3.116	4.691	-	38	9.013
Other receivables (from related parties including interest receivable)	-	35	219	4.254	-	150	4.658
Total receivables	-	1.203	3.335	8.945	-	188	13.671

* Amounts presented in the column 'Undefined terms' include loans with at least one day overdue payment, while the other payments based on the same loan agreement are distributed into the respective groups by the above repayment terms.

COMPANY'S FINANCIAL STATEMENTS FOR THE YEAR 2024

(all amounts are in EUR thousand unless otherwise stated)

Reconciliation (excluding related parties) of planned cash flows from loans granted with the net value of loans is presented below:

	As at 31 December 2024	As at 31 December 2023
Loans and receivables at year end including future interest, before write-offs of loans and receivables	12.936	9.080
Balance of the historically written-off loans at the beginning of the year	(67)	(67)
Additionally written off loans during the year	-	-
Recovered written-off loans during the year	1	-
Written-off loans at the year end	(66)	(67)
Loans and receivables at year end including future interest, after write-offs of loans and receivables	12.870	9.013
Less: Future interest	(4.620)	(2.969)
Loans and receivables, gross	8.250	6.044
Less: allowance for loans and receivables	(882)	(835)
Loans and receivables, net	7.368	5.209

Interest rate risk

General interest rate risk is the risk that the Company will incur losses due to interest rate fluctuations, when certain period interest rate bearing assets do not match the same period interest rate bearing liabilities.

As at 31 December 2024 and 2023, all the Company's issued loans and financial liabilities consisted of loans with fixed interest rates. As the interest rate risk is not relevant to the Company, the Company's management does not perform and present sensitivity analysis of the potential interest rate changes.

Foreign exchange risk

Foreign exchange risk is the risk that the Company will incur losses due to foreign exchange rate fluctuation. Loss/gain from currency fluctuations may occur when the Company's assets converted into foreign currency does not match liabilities converted to the same currency (i.e. when there is an open foreign currency position). All the Company's transactions are carried in EUR. As at 31 December 2024 and 2023, the Company had no loans or other material balances in other currencies.

19 Related party transactions

In accordance with IAS 24 Related Party Disclosures, the parties are considered related when one party can unilaterally or jointly control the other party or have significant influence over the other party in making financial or operating decisions or operation matters, or when parties are jointly controlled and if the members of management, their relatives or close persons who can unilaterally or jointly control the Company or have influence on it. To determine whether the parties are related, the assessment is based on the nature of relation rather than the form.

20 Provisions

The level of market interest rates with related party financing involved was examined through the market test in 2019. Taking this into account, the Company made EUR 40 thousand short-term provision to reduce tax risk. There was no provision made in 2024 and 2023.

21 Off-balance sheet liabilities

As at 31 December 2024 and 2023, the Company had no significant liabilities to acquire property, plant and equipment or intangible assets.

During the period from 2008 until 2024, the tax authority has not performed a full tax inspection of the Company. In accordance with applicable laws, the tax authorities have the right to check accounting registers and records of the company for three years prior to the current accounting period and may charge additional taxes and penalties.

The Company's management is not aware of any circumstances that would cause the company any additional material tax liabilities.

22 Events after the reporting period

There were no material events after the reporting period.
